## PROJECT PROFILE

### Mini Project

**Title: SMART PARKING SYSTEM**

**Description:** As the population increases in metropolitan cities the usage of vehicles have increased day by day leading to problems in parking system, we have developed an android app to reduce the parking problem and do secure parking using the Smart Parking under Slot Allocation method with the help of Android application. The main contribution of our proposed system is to find out status of the parking area and provide secured parking to the users.

### Main Project

**Title: DIGITAL AUTOMATION PAYMENT**

**Domain: Machine Learning**

**Description:** Toll Gate Automation which is a step towards improving a tracking and monitoring of vehicles. In this system, a computerized system automatically identifies an approaching vehicles and records the vehicle number and time. If the vehicle belong to the authorized person and group, it automatically open the Toll Gate and a predetermined amount is automatically deducted from its account.
